

QCSC 2026-27 ORIENTATION GUIDE

Dr. Ramesh Raj
Ph.D.

Biomedical

Jn. Secretary, SIFQ

What is new ?

1. Registration using our website – Title and Synopsis
2. Student Dashboard.
Login Team Leader QId
Password: Created During Registration
3. Email – Primary Communication and Mobile Number for WhatsApp Communication
4. Project Report – Follow template
5. Google Classroom
6. Round 0

Steps

ROUND 0

Qualification Round

1. Title / Synopsis will be evaluated and result will be sent via email as **Accepted** / **On-Hold** to primary email provided during registration
2. **Accepted**: Follow instruction in email and join Google Classroom.
3. **On-Hold**: Follow instruction in email and re-submit Tile/Synopsis before deadline.
4. Re-submitted Tile/Synopsis shall be evaluated again. You will receive the results via email.

SIFQATAR

Qatar Children Science Congress (QCSC). Round-0 Results.

Jun 24, 2026

Dear Team,

We are happy to announce that the Title/Synopsis was **ACCEPTED** to participation in QCSC.

Round 1 & 2 is via Google Classroom. Use the link below to join your respective Google Classroom.

<https://sifqatar.com/joinclass/>

Team Leader :

Team Leader Name: ISHITA JAIN

Team Member Name: ANKITH VENKATESHA RAO

Sub Theme: Patterns and Numbers in nature: Exploring Mathematics in the world around us

Project Title: Smart Patterns

Synopsis: Have you ever wondered how buildings can stay safe during earthquakes? Engineers are now using cool patterns from nature—called fractals—to help make buildings stronger and safer. Fractals are shapes that repeat again and again, like the branches of a tree or the pattern on a snowflake.

Please confirm your project details mentioned above to get Google Classroom Link:

Round 1 ^ ⋮

📄 QCSC 2026-27 Round 1 Report Submission ⋮

How to Submit Report

The screenshot shows the Classroom app interface. At the top, the navigation bar includes a menu icon, a profile icon, and the text "Classroom > Mock-Promoting pre...". Below the navigation bar, there are three tabs: "Stream", "Classwork" (which is selected and underlined), and "People". On the left side, there is a vertical sidebar with icons for home, calendar, classwork, download, and settings. The main content area shows a "Classwork" post titled "Round 1". Above the post, there is a "View your work" button and a "Topic filter" dropdown menu set to "All topics". The post itself is titled "QCSC 2026-27 Round 1 Report Submission" and is marked as "Assigned". It was posted at 13:10. The post content includes the text: "Please follow the attached reference file and submit your report in the same format before due date." and "Please note Submission are not accepted after due date." Below the text, there is a thumbnail of a report template and a link to "Report Template Round ... PDF". At the bottom of the post, there is a button labeled "View instructions" which is highlighted with a red rectangular box.

How to Submit Report

The screenshot displays the Google Classroom interface. At the top, the navigation bar shows a hamburger menu, a profile icon, and the text "Classroom > Mock-Promoting pre...". On the left sidebar, there are icons for Home, Calendar, Assignments, and Settings. The main content area shows an assignment titled "QCSC 2026-27 Round 1 Report Submission" with a status of "SIF Qatar • 13:10 (Edited 13:18)". The assignment instructions state: "Please follow the attached reference file and submit your report in the same format before due date." and "Please note Submission are not accepted after due date." Below the instructions, there is a preview of a PDF file titled "Report Templ..." and a "Class comments" section with a link to "Add a class comment". On the right side, a "Your work" panel is open, showing a list of items: "Google Drive", "Link", "File" (highlighted with a red box), and "Create new" (which includes "Docs", "Slides", "Sheets", "Drawings", and "Vids"). A "New" button is visible at the bottom right of the "Create new" section.

Round 1

Team Leader

Name:

QID:

Team Member

Name:

QID:

Guide Teacher

Name:

PROJECT TITLE

1. INTRODUCTION:

Description on background of the study and its relevance to the focal theme, rationale and social context.

2. HYPOTHESIS:

To be written clearly in one or two sentences.

3. OBJECTIVE(S):

To be written clearly point by point, not as running statement (not more than five points).

4. METHODOLOGY/EXPERIMENTATION:

Explain in detail about the experiment or methods.

Explain list of materials used and controls.

Provide neatly labeled sketches and/or diagram wherever necessary, document every step of the study by taking photograph, wherever necessary.

4.1 SURVEY: (IF ANY)

Clearly describe sampling procedure and sample size based on population, provide sample questionnaire used, document every step of the work by taking photograph whenever necessary.

4.2 CASE STUDY: (IF ANY)

This is a specific study carried out focusing on a particular area/ community to understand certain issues or their impact (In such cases, principles of survey will remain same, with explanation in context of the area/community covered, along with significant learning outcomes apart from the other processes of data analysis and interpretation).

Round 2 Template

Team Leader

Name:

QID:

Guide Teacher

Name:

PROJECT TITLE

1. INTRODUCTION:

Description on background of the study and its relevance to the focal theme, rationale and social context.

2. HYPOTHESIS:

To be written clearly in one or two sentences.

3. OBJECTIVE(S):

To be written clearly point by point, not as running statement (not more than five points).

4. METHODOLOGY/EXPERIMENTATION:

Explain in detail about the experiment or methods.

Explain list of materials used and controls.

Provide neatly labeled sketches and/or diagram wherever necessary, document every step of the study by taking photograph, wherever necessary.

4.1 SURVEY: (IF ANY)

Clearly describe sampling procedure and sample size based on population, provide sample questionnaire used, document every step of the work by taking photograph whenever necessary.

4.2 CASE STUDY: (IF ANY)

This is a specific study carried out focusing on a particular area/ community to understand certain issues or their impact (In such cases, principles of survey will remain same, with explanation in context of the area/community covered, along with significant learning outcomes apart from the other processes of data analysis and interpretation).

5. DATA COLLECTION:

This refers to what has been observed during the experimentation

Observation can be both qualitative as well as quantitative

The qualitative data needs to be transformed into quantitative form either using ranking approach or weighted index for numerical analysis

Round 2

6. DATA ANALYSIS AND INTERPRETATION:

The data that has been generated out of experiments/observations/survey need to be tabulated in a structured manner

Different tools and methods can be used to analyze the data, to understand the patterns that emerge from it, to get results and finally draw conclusions

(Remember, the raw data that is generated is not the final result. Raw data is to be analyzed using simple statistical methods/tools and then the interpretation of the result to be made)

7. RESULTS:

Results are the output of the study derived from data analysis and interpretation leading to meaningful outcomes with the help of a logical framework

Sometimes, it may be needed to redo the experiments to get consistent results, however, final result is the analyzed data presented in structured table as well as graphical form

7.1 CONCLUSION/INFERENCE: This is the logical end of the project where the experimenter tries to arrive at specific conclusions from the result(s)

(In a way, the whole objective of the project was to arrive at some conclusion, either positive or negative, which would lead to a better understanding of the problem)

7.2 SOLUTION TO THE PROBLEM: Once the problem is understood using the above steps, it may lead to one or more possible solutions

8. FUTURE SCOPE OF THE WORK (FOLLOW-UP):

Every research is open-ended

(In other words, in a defined time-period and with given resources, a research work cannot end-up to draw solution to that particular problem, which may need further refinement for suitable and wide application and hence, every research work must have some scope to do the same or similar study by the same researcher or other as and when necessity arises)

9. ACKNOWLEDGEMENT:

It is the duty of a researcher to acknowledge all the people who extended help in various forms for accomplishing the work, with a generous statement of gratitude

10. REFERENCES/BIBLIOGRAPHY:

This part includes the list of books, journals, magazines, articles consulted in relation to the project

(If these are referred to in the write-up of the project, then it is termed as reference; else it is bibliography/ literature cited)

On-Hold Email

SIFQATAR

Qatar Children Science Congress (QCSC), Round-0 Results.

Jun 24, 2026

Dear Team,

Title/Synopsis submitted was **ON-HOLD** for participation in QCSC. We feel it is not competitive enough.

We are happy to provide another chance to rework/improve and re-submit your Title/Synopsis **before the deadline**. You are allowed to change your sub-theme if you feel necessary.

Use the link below to re-submit. *Please note you can submit only once.*

<https://sifqatar.com/qcsc-re-submit/>

Your submission shall be evaluated again. Final results for Round 0 will be emailed.

Team Leader :

Desert farming: Growing Green in harsh climates

New Project Title: (Make necessary changes below)

Hydroponics with air water harvester

New Synopsis: (Make necessary changes below)

This project combines hydroponic farming with an air water harvester to support sustainable agriculture in water-scarce regions. The harvester extracts moisture from the air, filters it, and supplies it to the hydroponic system, ensuring efficient plant growth with minimal reliance on conventional water sources.

ROUND 1

Feedback Round

1. **Join Google Classroom.**
Follow instruction in your email.
2. **Submit Round 1 report** as per template before deadline.
3. **Receive feedback** via Zoom or a Face-Face meeting
4. **No Elimination** in this round

ROUND 2

Elimination Round

1. In the same Google Classroom submit Round 2 report before deadline.
2. You will attend Face-Face meeting. Dates please check our website.
3. Finalist: Wait for results to be announced.
4. Results will be announced via Email/WhatsApp/Website.

THE FINALS[®]

1. The qualified teams shall present their completed projects for Face-Face evaluation
2. The teams should carry their project report in the format as mentioned in the 'QCSC Report Template'.
3. Functional projects should be in working condition. Non functional project must have a complete model.
4. Winner shall be selected.

PROJECT REPORT STRUCTURE

The word limit for the written report should not exceed 2500 - 3500

1. INTRODUCTION:

Description on background of the study and its relevance to the focal theme, rationale and social context

2. HYPOTHESIS:

To be written clearly in one or two sentences

3. OBJECTIVE(S):

To be written clearly point by point, not as running statement (not more than five points)

4. METHODOLOGY/EXPERIMENTATION:

Explain in detail about the experiment or methods.

Explain list of materials used and controls

Provide neatly labeled sketches and/or diagram wherever necessary, document every step of the study by taking photograph, wherever necessary.

4.1 SURVEY: (IF ANY)

Clearly describe sampling procedure and sample size based on population, provide sample questionnaire used, document every step of the work by taking photograph whenever necessary

4.2 CASE STUDY: (IF ANY)

This is a specific study carried out focusing on a particular area/ community to understand certain issues or their impact (In such cases, principles of survey will remain same, with explanation in context of the area/community covered, along with significant learning outcomes apart from the other processes of data analysis and interpretation)

5. DATA COLLECTION:

This refers to what has been observed during the experimentation

Observation can be both qualitative as well as quantitative

The qualitative data needs to be transformed into quantitative form either using ranking approach or weighted index for numerical analysis

6. DATA ANALYSIS AND INTERPRETATION:

The data that has been generated out of experiments/observations/survey need to be tabulated in a structured manner

Different tools and methods can be used to analyze the data, to understand the patterns that emerge from it, to get results and finally draw conclusions

(Remember, the raw data that is generated is not the final result. Raw data is to be analyzed using simple statistical methods/tools and then the interpretation of the result to be made)

7. RESULTS:

Results are the output of the study derived from data analysis and interpretation leading to meaningful outcomes with the help of a logical framework

Sometimes, it may be needed to redo the experiments to get consistent results, however, final result is the analyzed data presented in structured table as well as graphical form

7.1 CONCLUSION/INFERENCE: *This is the logical end of the project where the experimenter tries to arrive at specific conclusions from the result(s)*

(In a way, the whole objective of the project was to arrive at some conclusion, either positive or negative, which would lead to a better understanding of the problem)

7.2 SOLUTION TO THE PROBLEM: *Once the problem is understood using the above steps, it may lead to one or more possible solutions*

8. FUTURE SCOPE OF THE WORK (FOLLOW-UP):

Every research is open-ended

(In other words, in a defined time-period and with given resources, a research work cannot end-up to draw solution to that particular problem, which may need further refinement for suitable and wide application and hence, every research work must have some scope to do the same or similar study by the same researcher or other as and when necessity arises)
